Hydraulics & Pneumatics

1964 Editorial Index

AEROSPACE EQUIPMENT, INCLUDING GROUND SUPPORT

Bimetallic Seal Solves Cryogenic Sealing Problems
By Wm. A. Prince Nov. p 105
Conventional Components Boost C-141 Reliability
By Charles H. Cannon Mar. p 103
Cylinders Quickly Couple 8000-hp Coupling Sept. p 20
Designing a 5500 F Gas Valve Aug. p 81
Dual Filters Increase Aircraft Reliability
By Donald B. Meredith Feb. p 68
Environmental Testing of Hydraulic Pumps
By J. A. Denneny, Jr. and C. B. Brantley June p 82
Fluid Power's Role in Aerospace Ground Equipment Dec. p 55
GSE Classifications Aid Designers Mar. p 97
High Purity Air Compressor Supplies Pershing Air Bearings
By Joseph W. Mahanay Sept. p 121
Inline Power Pack on X-15 Rocket Plane Sept. p 127
New 5606 Fluid—Shear Stability Up, Contamination Down
By Thomas N. Deane Oct. p 130
One-Hand Control for a Hydrostatic Drive
By Raymond J. Enyeart Nov. p 74
Programmed Power Concept for XB-70 Fluid Power Systems Aug. p 75
Pulsating Hydraulics Reported at SAE Aerospace Meeting
By Edwin Jacobs Nov. p 99
Reaction Systems for Little Joe Vehicle Oct. p 127
SAE Group Discusses Pressure Effects Feb. p 67
727 Hydraulics—More and Better
By James E. Klansnik July p 100
Simplicity Highlights Thor's Gimbal Actuation System
By D. A. Steinmeyer May p 132
Starting Jet Engines with Plant Air
By Richard Morley Feb. p 64
Togetherness Pays Off in Power Pack
By Scholer Bangs May p 136
What Grumman Learned About Testing Pumps
By Frank Dini and Charles Coss Apr. p 97

AIR COMPRESSORS, VACUUM PUMPS, & ASSOCIATED EQUIPMENT

Aerospace Pumps, Air Compressors & Motors—Fluid Power Products Review Jan. p 220
Air Compressors—Quick Guide to Product Selection Jan. p 75
Air Motors, Compressors, & Vacuum Pumps—Fluid Power Products Review Jan. p 134
Determine Air Receiver Size with This Nomogram
By F. Caplan Nov. p 79
Fitting Compressed Air Capacity to Production May p 16
High Purity Air Compressor Supplies Pershing Air Bearings
By Joseph W. Mahanay Sept. p 121
How to Specify a Reciprocating Air Compressor
By W. D. Laird Feb. p 47

ASSOCIATION & TECHNICAL MEETINGS, SURVEYS, STANDARDS

ASA Approves NFPA Cylinder Code July p 40
Ben Pierce Will Guide NFPA Aug. p 32
Component Workshops Fill NFPA Meeting Feb. p 18
Controls Conference Held at U. of Wisconsin June p 20
FPS Continues Expansion in 4th Year July p 20
FPS Sets Educational Goals Feb. p 17
Fluid Power at the Iron & Steel Show Nov. p 26
Fluid Power Conference Stresses Present and Future Needs Jan. p 30
GSE Classifications Aid Designers Mar. p 97
Machine Tool Conference Aug. p 20
Mobile Hydraulics in Britain Mar. p 24
NFPA Issues New Publication Jul p 30
National Conference on Fluid Power Oct. p 81
New 5606 Fluid—Shear Stability Up, Contamination Down
By Thomas N. Deane Oct. p 130
New Hose Spec Stresses Safety June p 36
Pulsating Hydraulics Reported at SAE Aerospace Meeting
By Edwin Jacobs Nov. p 99
SAE Group Discusses Pressure Effects Feb. p 67
Standards for Control Valve Flow Capacities Oct. p 30

BASIC TECHNOLOGY

Analogue Computers Speed Hydraulic System Design
By R. N. Franzle Apr. p 73
Bimetallic Seal Solves Cryogenic Sealing Problems
By Wm. A. Prince Nov. p 105
Convert Viscosity with These Nomographs
By Robert L. Peters May p 118
How to Calculate Hydrostatic Transmission Coefficients
By Warren E. Wilson Sept. p 104
How to Determine Air Flow Through Fixed and Variable Orifices
By William Weibel Aug. p 68
Measuring Fluid Bulk Modulus
By A. T. J. Hayward Dec. p 70
Predicting On-the-Job Performance of Hydraulic Systems
By Miles O. Dustin Apr. p 70
Principles of Fluid Power Storage—Part 2
By Walter Ernst and Howard Purcell Feb. p 53
Thermal Analysis of Hydraulic Systems. Part 1
By Jerald D. Parker and Faye C. McQuiston Aug. p 57
Part 2 Oct. p 112

CIRCUIT DESIGN

A Simple Hydraulic Vibrator
By Stan Stockwell Sept. p 98
Air Jets Sense Position
By Kenneth L. Elkins May p 128
Air Pilot Circuit Plugs into Machine Controls
By William H. Lucas Sept. p 100
Bypass Valves Reduce Flow Requirement, Eliminate Pump
By Robert E. Stauffer Oct. p 105
Check Valves Cut System Cost Mar. p 82
Circuit Ideas from a Transfer Molding Machine
By M. Brodsky Mar. p 88
Closed Circuit Releases Valve Detents
By Orval Rice Aug. p 55
Computer Sizes Parameters of a Pneumatic Scram System
By Ralph H. Larson Oct. p 94
Control-Panel Valves Set Pressure and Flow for Remote Components
By C. H. Tepas and Arthur Antram May p 98
Controlling Pump Displacement for Accurate Speed
By Robert V. McNeill Oct. p 102
Controlling Rate of Pump Output Controls Cylinder Acceleration
By Frank G. Cizek Apr. p 86
Design Ideas from a Numerically Controlled Machine Tool
By Robert K. Sedgwick Feb. p 41
Digital System Programs Hydropneumatic Actuator
By Frederick J. Shepps and Donald A. Vogtman Dec. p 74
Electrical Control of Fluid Power Systems
By K. B. Rexford Mar. p 69
Fail-Safe Design for Hydraulic Positioning
By E. W. Reid and C. L. Guthrie Nov. p 76
Floating Piston Follows Curved Surface July p 28
Geared Motors Synchronize Telescoping Cylinders
By George A. Grappo Sept. p 102
Hi-Lo Circuit Uses Pressure-Compensated Pump
By Norman M. Dean Sept. p 116
Hydraulic Power and Control Circuit for a Cutoff Saw Apr. p 24
Low Energy Rate Forming Cuts Die Costs
By Robert L. Ballard July p 26
Mechanical Feedback Regulates Hydro-Pneumatic Speed Control
By Takashi Nakamura and Yoshio Okabe June p 61
Modernizing the Hydraulic Circuit on a Pipe Lathe
By J. Yonk and S. G. Tansey Mar. p 94
One-Hand Control for a Hydrostatic Drive
By Raymond J. Enyeart Nov. p 74
Open Center Circuit Floats Mower's Cutters
By J. Woodward May p 90
Play Tic-Tac-Toe Against Pneumatic Logic
By Donald E. Gauthier Mar. p 73
Pneumatic Logic Circuits—Part 8
By E. L. Holbrook Apr. p 84
Part 9 May p 120
Part 10 June p 76
Part 11—Sequencing Air Cylinders Nov. p 96
Programmed Speed for Blow Molder
By Joseph A. Bronsard June p 70
Pumps Synchronize Single Acting Cylinders Up and Down
By A. T. Browne May p 92
Saving Tools with Antijump Circuits
By Dolph D. Wright May p 124
Self-Adjusting Relief Valve
By Allan M. Steel Nov. p 71
Self-Sequencing Air Circuit
By Alfred Jacobs Dec. p 80
Simplicity Highlights Thor's Gimbal Actuation System
By D. A. Steinmeyer May p 132
Spool Valve Times Hydraulic Flow
By William J. Millard May p 96
10 Ways to Use Pilot-Operated Relief Valves
By Mario J. Quinto and Samuel G. Taylor May p 87
200 psi + Intensifier + Linkage = 100 Tons
By Henry Hopfeld Mar. p 86
Two-Pressure Circuit Tests Aircraft Valve
By Lee Edwards Mar. p 76
Understanding Pressure-Compensated Flow Controls
By Charles O. Breitsprecher June p 72
Using Pressure-Compensated Flow Control Valves
By Elton E. Dyal Apr. p 81

COMPONENTS (See also specific components)

Accumulators—Quick Guide to Product Selection Jan. p 74
Aerospace Accessories—Fluid Power Products Review Jan. p 216
Intensifiers and Hand Pumps—Quick Guide to Product Selection Jan. p 102
Pressure Gauges—Quick Guide to Product Selection Jan. p 108

Accumulators—Quick Guide to Product Selection Jan. p 74
Aerospace Accessories—Fluid Power Products Review Jan. p 216
Intensifiers and Hand Pumps—Quick Guide to Product Selection Jan. p 102
Pressure Gauges—Quick Guide to Product Selection Jan. p 108

Principles of Fluid Power Storage—Part 2
By Walter Ernst and Howard Purcell Feb. p 53
Technical Literature Review July p 67

CYLINDERS, SHOCK ABSORBERS, INTENSIFIERS

Air Cylinders Sequence Feed Mixer
By William J. Cavanaugh May p 94
Computer Sizes Parameters of a Pneumatic Scram System
By Ralph H. Larson Oct. p 94
Cylinders & Intensifiers—Fluid Power Products Review Jan. p 148
Cylinders—Quick Guide to Product Selection Jan. p 80
Geared Motors Synchronize Telescoping Cylinders
By George A. Grappo Sept. p 102
How They're Simplifying Hydraulic Maintenance
By Tobi Goldoftas Sept. p 87
Interconnected Air Cylinders Cut Lumber to Size
By Norman B. Peterson Aug. p 62
Raising Heavy Loads at Constant Speed and Pressure
By Robert L. Hoffman and Robert A. Neiminski Dec. p 76
Shock Absorbers Stop 3000 lb Test Bars Oct. p 23
Technical Literature Review July p 67
200 psi + Intensifier + Linkage = 100 Tons
By Henry Hopfeld Mar. p 86
Two-Pressure Circuit Tests Aircraft Valve
By Lee Edwards Mar. p 76

ELECTRIC MOTORS & CONTROLS

Air Cylinder Converted to Vacuum Pump
By W. Norman Stanton & G. S. Dillin Oct. p 120
Air Cylinders Sequence Feed Mixer
By William J. Cavanaugh May p 94
Check Valves Cut System Cost Mar. p 82
Controlling Pump Displacement for Accurate Speed
By Robert V. McNeill Oct. p 102
Electrical Control of Fluid Power Systems
By K. B. Rexford Mar. p 69
Electric Controls & Motors—Fluid Power Products Review Jan. p 156
Pressure Switches—Quick Guide to Product Selection Jan. p 109
Pumps Synchronize Single Acting Cylinders Up and Down
By A. T. Browne May p 92
Technical Literature Review July p 67

FLUIDS, FILTERS, RESERVOIRS, OIL COOLERS

Aerospace Filters & Fluids—Fluid Power Products Review Jan. p 218
Compatibility—Matching Seals to Fire-Resistant Fluids
By J. N. Smith Sept. p 112
Convert Viscosity with These Nomographs
By Robert L. Peters May p 118
Design Forum: Requirements for Filtration in Servo Systems Nov. p 12
Design Ideas from a Numerically Controlled Machine Tool
By Robert K. Sedgwick Feb. p 41
Dual Filters Increase Aircraft Reliability
By Donald B. Meredith Feb. p 68
Heat Exchangers—Quick Guide to Product Selection Jan. p 96
How Hydraulic Fluid Affects Die Casting Quality
By Earl W. Rearwin Nov. p 90
How Oil Temperatures Are Controlled
By W. P. Bartz Feb. p 46
How They're Simplifying Hydraulic Maintenance
By Tobi Goldoftas Sept. p 87
Hydraulic Filters—Quick Guide to Product Selection Jan. p 98
Hydraulic Fluids—Quick Guide to Product Selection Jan. p 100
I-Beam Is Bender's Reservoir Mar. p 40
Measuring Fluid Bulk Modulus
By A. T. J. Hayward Dec. p 70
New 5606 Fluid—Shear Stability Up, Contamination Down
By Thomas N. Deane Oct. p 130
Power Units, Heat Exchangers, Fluids & Reservoirs—Fluid Power Products Review Jan. p 200
727 Hydraulics—More and Better
By James E. Klansnik July p 100
Silting I dex—What It Is—How To Find It—What It Tells
By J. K. Van Loon Mar. p 78
Technical Literature Review July p 67
Thermal Analysis of Hydraulic Systems. Part 1
By Jerald D. Parker and Faye C. McQuiston Aug. p 57
Part 2 Oct. p 112
What Grumman Learned About Testing Pumps
By Frank Dini and Charles Coss Apr. p 97

FLUID MOTORS, ROTARY ACTUATORS (Hydraulic & Pneumatic) & HYDRAULIC TRANSMISSIONS

Air Motors, Compressors, & Vacuum Pumps—Fluid Power Products Review Jan. p 134
Air Motors—Quick Guide to Product Selection Jan. p 79
Design Ideas from a Numerically Controlled Machine Tool
By Robert K. Sedgwick Feb. p 41
Fluid Motors—Quick Guide to Product Selection Jan. p 94
Geared Motors Synchronize Telescoping Cylinders
By George A. Grappo Sept. p 102
How to Calculate Hydrostatic Transmission Coefficients
By Warren E. Wilson Sept. p 104
Hydraulic Pumps, Motors & Accumulators—Fluid Power Products Review Jan. p 174
Hydraulic Winch Has Integral Fluid Motor Mar. p 32
Hydrodifferential Transmissions—New Designs for Variable Speed. Part 1—Piston and Vane Types
By M. Shachter Apr. p 65
Part 2—Gear Types Aug. p 64
Oil Lubricates and Cushions Rotary Actuator Aug. p 16
One-Hand Control for a Hydrostatic Drive
By Raymond J. Enyeart Nov. p 74
Open Center Circuit Floats Mower's Cutters
By J. Woodward May p 90
Predicting the Performance of a Hydrodifferential Transmission
By Warren E. Wilson Nov. p 80
Remote Control for Tanker's Valves Oct. p 18
Rotary Actuators—Quick Guide to Product Selection Jan. p 115
Single Lever Controls Vehicle Drive July p 16
Technical Literature Review July p 67

MACHINE TOOLS

Air Permits Design of Compact, High Speed Clutch
By Karl Schubert July p 94
Design Ideas from a Numerically Controlled Machine Tool
By Robert K. Sedgwick Feb. p 41
How Oil Temperatures Are Controlled
By W. P. Bartz Feb. p 46
Hydraulic Power and Control Circuit for a Cutoff Saw Apr. p 24
Pressure Control Improves Keyseater Adjustments May p 18
Rebuilt Mill Uses Air-Oil Feed
By Otis Butler July p 90
Saving Tools with Antijump Circuits
By Dolph D. Wright May p 124

MOBILE & MARINE EQUIPMENT

Bypass Valves Reduce Flow Requirement, Eliminate Pump
By Robert E. Stauffer Oct. p 105
Closed Circuit Releases Valve Detents
By Orval Rice Aug. p 55
Control-Panel Valves Set Pressure and Flow for Remote Components
By C. H. Tepas and Arthur Antram May p 98
Electrohydraulic System Controls Paving Head
By John Girvan Apr. p 90
Fishing with Hydraulic Power Aug. p 16
Fluid Power's Role in Ground Support Equipment Dec. p 55
How They're Simplifying Hydraulic Maintenance
By Tobi Goldoftas Sept. p 87
Hydraulic Excavator Has 5000-psi, 2000-psi Systems Nov. p 20
Hydrodifferential Transmissions—New Designs for Variable Speed—Part 1—Vane and Piston Types
By M. Shachter Apr. p 65
Part 2—Gear Types Aug. p 64
Master-Slave System Steers Heavy Trailer Mar. p 38
Mobile Hydraulics in Britain Mar. p 24
Open Center Circuit Floats Mower's Cutters
By J. Woodward May p 90
Raising Heavy Loads at Constant Speed and Pressure
By Robert L. Hoffman and Robert A. Nieminski Dec. p 76
Remote Control for Tanker's Valves Oct. p 18
Servo System Steers Lift Truck Mar. p 90
Single Lever Controls Vehicle Drive July p 16

PACKINGS & SEALS

Aerospace Seals, Tubing & Connectors—Fluid Power Products Review Jan. p 222
Bimetallic Seal Solves Cryogenic Sealing Problems
By Wm. A. Prince Nov. p 105
Compatibility—Matching Seals to Fire-Resistant Fluids
By J. N. Smith Sept. p 112
Hydraulic Service Tips
By G. C. Bonnell Mar. p 92
Plastic Seals Loaded by O-rings Sept. p 26
Seals & Packings—Fluid Power Products Review Jan. p 212
Seals, Scrapers, Backup Rings—Quick Guide to Product Selection Jan. p 116
727 Hydraulics—More and Better
By James E. Klansnik July p 100
Technical Literature Review July p 67

PLUMBING

Aerospace Seals, Tubing & Connectors—Fluid Power Products Review Jan. p 222
Design Ideas from a Numerically Controlled Machine Tool
By Robert K. Sedgwick Feb. p 41
Hose, Fittings, & Assemblies—Quick Guide to Product Selection Jan. p 97
How They're Simplifying Hydraulic Maintenance
By Tobi Goldoftas Sept. p 87
Piping Components—Fluid Power Products Review Jan. p 193
Quick Connect Couplings—Quick Guide to Product Selection Jan. p 113
Rotating & Swivel Joints—Quick Guide to Product Selection Jan. p 101
727 Hydraulics—More and Better
By James E. Klansnik July p 100
Technical Literature Review July p 67
Tube and Port Fittings—Quick Quide to Product Selection Jan. p 120

PNEUMATICS (Including air filters, lubricators, dryers)

Air Cylinder Converted to Vacuum Pump
By W. Norman Stanton and G. S. Dillin Oct. p 120
Air Cylinders Sequence Feed Mixer
By William J. Cavanaugh May p 94
Air Jets Sense Position
By Kenneth L. Elkins May p 128
Air Filters—Quick Quide to Product Selection Jan. p 76
Air Lubricators—Quick Guide to Product Selection Jan. p 78
Air Permits Design of Compact, High Speed Clutch
By Karl Schubert July p 94
Air Pilot Circuit Plugs into Machine Controls
By William H. Lucas Sept. p 100

Computer Sizes Parameters of a Pneumatic Scram System
By Ralph H. Larson Oct. p 94
Dehydrators—Quick Guide to Product Selection Jan. p 79
Designing a Pneumatic Pressure Programmer
By Trygve S. Neprud Apr. p 69
Determine Air Receiver Size with This Nomogram
By F. Caplan Nov. p 79
Digital System Programs Hydropneumatic Actuator
By Frederick J. Shepps and Donald A. Vogtman Dec. p 74
Dry Air by Refrigeration Nov. p 22
Filters, Lubricators & Dryers—Fluid Power Products Review Jan. p 160
Floating Piston Follows Curved Surface July p 28
High Purity Air Compressor Supplies Pershing Air Bearings
By Joseph W. Mahanay Sept. p 121
High Temperature Die Changer Has Air-Oil Actuation
By Eric T. Vogel Nov. p 86
How to Determine Air Flow Through Fixed and Variable Orifices
By William Weibel Aug. p 68
How to Specify a Reciprocating Air Compressor
By W. D. Laird Feb. p 47
Interconnected Air Cylinders Cut Lumber to Size
By Norman B. Peterson Aug. p 62
Lubricating the Tough Jobs Apr. p 16
Mechanical Feedback Regulates Hydro-Pneumatic Speed Control
By Takashi Nakamura and Yoshio Okabe June p 61
One Pneumatic Operation Replaces Three
By Dan C. Chwalisz Sept. p 108
Play Tic-Tac-Toe Against Pneumatic Logic
By Donald E. Gauthier Mar. p 73
Pneumatic Logic Circuits—Part 8
By E. L. Holbrook Apr. p 84
Part 9 May p 120
Part 10 June p 76
Part 11—Sequencing Air Cylinders Nov. p 96
Predicting the Performance of a Hydrodifferential Transmission
By Warren E. Wilson Nov.p 80
Pulse-Bleed Control Valves Simplify Assembly Circuit
By J. V. Patton and John N. Magaw Apr. p 89
Rebuilt Mill Uses Air-oil Feed
By Otis Butler July p 90
Self-Sequencing Air Circuit
By Alfred Jacobs Dec. p 80
Starting Jet Engines with Plant Air
By Richard A. Morley Feb. p 64
Technical Literature Review July p 67
200 psi + Intensifier + Linkage = 100 Tons
By Henry Hopfeld Mar. p 86

PRESSES

Air Cylinder Converted to Vacuum Pump
By W. Norman Stanton and G. S. Dillin Oct. p 120
Check Valves Cut System Cost Mar. p 82
Circuit Ideas from a Transfer Molding Machine
By M. Brodsky Mar. p 88
Controlling Pump Displacement for Accurate Speed
By Robert V. McNeil Oct. p 102
Controlling Rate of Pump Output Controls Cylinder Acceleration
By Frank G. Cizek Apr. p 86
Hi-Lo Circuit Uses Pressure-Compensated Pump
By Norman M. Dean Sept. p 116
Pressure and Position Controls for a Compacting Press
By Fred W. Dorenbos Feb. p 61
200 psi + Intensifier + Linkage = 100 Tons
By Henry Hopfeld Mar. p 86

PRODUCTION EQUIPMENT, (Including Central Hydraulic Systems)

Air Cylinder Converted to Vacuum Pump
By W. Norman Stanton and G. S. Dillin Oct. p 120
Air Cylinders Sequence Feed Mixer
By William J. Cavanaugh May p 94
Air Jets Sense Position
By Kenneth L. Elkins May p 128
Air Pilot Circuit Plugs into Machine Controls
By William H. Lucas Sept. p 100
Controlling Pump Displacement for Accurate Speed
By Robert V. McNeill Oct. p 102
Fail-Safe Design for Hydraulic Positioning
By E. W. Reid and C. L. Guthrie Nov. p 76
Geared Motors Synchronize Telescoping Cylinders
By George A. Grappo Sept. p 102
High Temperature Die Changer Has Air-Oil Actuation
By Eric T. Vogel Nov. p 86
I-Beam Is Bender's Reservoir Mar. p 40
Interconnected Air Cylinders Cut Lumber to Size
By Norman B. Peterson Aug. p 62
Low Energy Rate Forming Cuts Die Costs
By Robert L. Ballard July p 96
Mechanical Feedback Regulates Hydro-Pneumatic Speed Control
By Takashi Nakamura and Yoshio Okabe June p 61
Mechanized Die Core Movement
By Irvin Hollander Mar. p 84
Modernizing the Hydraulic Circuit on a Pipe Lathe
By J. Yonk and S. G. Tansey Mar. p 94
One Pneumatic Operation Replaces Three
By Dan C. Chwalisz Sept. p 108
Pilot Valve Controls Fluid in Tube Expander
By Bernard Mazis Apr. p 78
Programmed Speed for Blow Molder
By Joseph A. Bronsard June p 70
Pulse-Bleed Control Valves Simplify Assembly Circuit
By J. V. Patton & John N. Magaw Apr. p 89
Self-Adjusting Relief Valve
By Allan M. Steel Nov. p 71
Shock Absorbers Stop 3000 lb Test Bars Oct. p 23
Six Cylinders Stack Concrete Blocks Sept. p 18

PUMPS

Aerospace Pumps, Air Compressors & Motors—Fluid Power Products Review Jan. p 220
Air Motors, Compressors, & Vacuum Pumps—Fluid Power Products Review Jan. p 134
Controlling Pump Displacement for Accurate Speed
By Robert V. McNeill Oct. p 102
Design Ideas from a Numerically Controlled Machine Tool
By Robert K. Sedgwick Feb. p 41
Designing a Pressure-Balanced Gear Pump for High Pressures
By Don S. Strader June p 66
Environmental Testing of Hydraulic Pumps
By J. A. Denneny, Jr. and C. B. Brantley June p 82
Hi-Lo Circuit Uses Pressure-Compensated Pump
By Norman M. Dean Sept. p 116
How They're Simplifying Hydraulic Maintenance
By Tobi Goldoftas Sept. p 87
Hydraulic Excavator Has 5000-psi, 2000-psi Systems Nov. p 20
Hydraulic Pumps, Motors & Accumulators—Fluid Power Products Review Jan. p 174
Hydraulic Service Tips
By G. C. Bonnell Mar. p 92
Intensifiers and Hand Pumps—Quick Guide to Product Selection Jan. p 102
Plunger Pumps Recover Fluid Quickly Nov. p 18
Pumps—Quick Guide to Product Selection Jan. p 110
727 Hydraulics—More and Better
By James E. Klansnik July p 100
Technical Literature Review July p 67
Thermal Analysis of Hydraulic Systems. Part 1.
By Jerald D. Parker and Faye C. McQuiston Aug. p 57
Part 2 Oct. p 112
What Grumman Learned About Testing Pumps
By Frank Dini and Charles Coss Apr. p 97

SERVO SYSTEMS AND COMPONENTS

Computer Sizes Parameters of a Pneumatic Scram System
By Ralph H. Larson Oct. p 94
Conventional Components Boost C-141 Reliability
By Charles H. Cannon Mar. p 103
Design Forum: Requirements for Filtration in Servo Systems Nov. p 12
Design Ideas from a Numerically Controlled Machine Tool
By Robert K. Sedgwick Feb. p 41
Designing a Pneumatic Pressure Programmer
By Trygve S. Neprud Apr. p 69
Designing the Servo Drive for a Rocking Table
By H. R. Martin July p 84
Electrohydraulic System Controls Paving Head
By John Girvan Apr. p 90
One-hand Control for a Hydrostatic Drive
By Raymond J. Enyeart Nov. p 74
Servo System Steers Lift Truck Mar. p 90
Servovalves—Quick Guide to Product Selection Jan. p 119
Technical Literature Review July p 67
The Torque Motor as a Separate Servovalve Component
By Nicholas D. Trbovich May p 103

TEST EQUIPMENT

Designing the Servo Drive for a Rocking Table
By H. R. Martin July p 84
Environmental Testing of Hydraulic Pumps
By J. A. Denneny, Jr. and C. B. Brantley June p 82
Predicting On-the-Job Performance of Hydraulic Systems
By Miles O. Dustin Apr. p 70
Pressure & Level Gauges, Switches, Instruments, & Test Eqpt.—Fluid Power Products Review Jan. p 208
Silting Index—What It Is—How To Find It—What It Tells
By J. K. Van Loon Mar. p 78
Two-Pressure Circuit Tests Aircraft Valve
By Lee Edwards Mar. p 76

VALVES

A Time Delay Relief Valve
By Dr. Philip Barkan and Ugo R. Tognella Oct. p 118
Aerospace Valves—Fluid Power Products Review Jan. p 299
Air & General Purpose Valves—Fluid Power Products Review Jan. p 142
Air/Oil Valve Monitors Lube Oil Flow Apr. p 18
Air Pilot Circuit Plugs into Machine Controls
By William H. Lucas Sept. p 100
Bypass Valves Reduce Flow Requirement, Eliminate Pump
By Robert E. Stauffer Oct. p 105
Closed Circuit Releases Valve Detents
By Orval Rice Aug. p 55
Control-Panel Valves Set Pressure and Flow for Remote Components
By C. H. Tepas and Arthur Antram May p 98
Designing a 5500 F Gas Valve
By John T. Herbert Aug. p 81
Designing a Pneumatic Pressure Programmer
By Trygve S. Neprud Apr. p 69
Directional Control Valves—Quick Guide to Product Selection Jan. p 84
Floating Piston Follows Curved Surface July p 28
Flow Control Valves—Quick Guide to Product Selection Jan. p 90
How They're Simplifying Hydraulic Maintenance
By Tobi Goldoftas Sept. p 87
How to Determine Air Flow Through Fixed and Variable Orifices
By William Weibel Aug. p 68
Hydraulic Service Tips
By G. C. Bonnell Mar. p 92
Hydraulic Valves—Fluid Power Products Review Jan. p 184
Pilot Valve Controls Fluid in Tube Expander
By Bernard Mazis Apr. p 78
Plug-In Valves—Key to Faster Maintenance Dec. p 78
Pressure Control Valves—Quick Guide to Product Selection Jan. p 103

Pulse-Bleed Control Valves Simplify Assembly Circuit
By J. V. Patton and John N. Magaw Apr. p 89
Pumps Synchronize Single Acting Cylinders Up and Down
By A. T. Browne May p 92
Self-Adjusting Relief Valve
By Allan M. Steel Nov. p 71
Spool Valve Times Hydraulic Flow
By William J. Millard May p 96
Technical Literature Review July p 67
10 Ways to Use Pilot-Operated Relief Valves
By Mario J. Quinto and Samuel G. Taylor May p 87
Understanding Pressure-Compensated Flow Controls
By Charles O. Breitsprecher June p 72
Using Pressure-Compensated Flow Control Valves
By Elton E. Dyal Apr. p 81

AUTHOR INDEX

Antram, Arthur and C. H. Tepas
Control-Panel Valves Set Pressure and Flow for Remote Components May p 98
Ballard, Robert L.
Low Energy Rate Forming Cuts Die Costs July p 96
